Scope & Contents Note

See also separate finding aids for the papers of some clients with larger quantities of records extant.

Finding aids

The cataloguing information can also be accessed by using the Collections Browser www.collections.falkirk.gov.uk

Arrangement

The records are arranged in broadly alphabetical order of the client. Some papers are disputes between two or more parties and it is not clear which party was the client of Russel & Aitken so one has been chosen for the purposes of this arrangement. For executry papers, although the actual client may have been the executor or other heirs, for the purposes of this finding aid, the client is identified as the as the deceased person whose executry was dealt with by Russel & Aitken.

Where papers are clearly of related family members the papers have been grouped together (using sub numbers). It is not known whether other individuals with the same surname are related to each other and their papers are therefore individually listed. With such a large collection, it is likely that there are mistakes in these groupings and any researchers identifying these mistakes after examining the records are encourage to notify Falkirk Archives of this.
